Exploratory Data Analysis for Machine Learning (EDA) - MODULE 4 - Introduction - QUIZ 1 - Estimation and Inference, and Hypothesis Testing

Link: Exploratory Data Analysis for Machine Learning (EDA) - MODULE 4 - Introduction - QUIZ 1 - Estimation and Inference, and Hypothesis Testing

1. (True/False) In general, the population parameters are unknown.   1 / 1 point

    ◉ True.

    ○ False.

    ⊘ **Correct**
    Correct!

2. (True/False) Parametric models have **finite** number of parameters.   1 / 1 point

    ◉ True.

    ○ False.

    ⊘ **Correct**
    Correct!

3. The most common way of estimating parameters in a parametric model is: 1 / 1 point

    ◉ using the maximum likelihood estimation

    ○ using the central limit theorem

    ○ extrapolating a non-parametric model

    ○ extrapolating Bayesian statistics

    ⊘ **Correct**
    Correct!
